

# ATTENTION

The Claw anchor top supplied with the AutoBrace2 can be used with a chain to perform a vehicle lift. In order for this to be safely and successfully executed the strut has to be positioned correctly as illustrated. Failure to follow this procedure can result in personal injury and damage to to equipment.

**Correct** method of placing the claw top for use with a chain for lifting. Claw top and chain are resting against the body of the vehicle.

**Incorrect** method of placing claw top and chain for lifting. Claw and top are not supported by a vehicle body panel.
